Department of Science and Technology
2nd year ST LMD

Module : English
Duration : 1h
January 23th, 2022.

Student's full name :

Group/Class :

Text

Multimedia is a term frequently heard and discussed among educational technologists today. It can refer to a mix of various mass media such as print, audio and video.

Multimedia enables learning through exploration, discovery and experience. With multimedia the process of learning becomes more goal-oriented, flexible in time and space. For example, in teaching biology, an instructor cannot make an instinct animal come alive in a classroom. Multimedia enables us to provide a way by which learners can experience their subject in an easy manner, via data shows, holograms, or via the 2D or 3D animations.

Questions

Part one:

1. Answer the following questions according to the text

- a) How multimedia helps in the process of learning?
..... Through exploration, discovery, & experience
